To Whom It May Concern,

We were delighted to have Kasey Greene as a featured speaker at our Cystic Fibrosis Family Education Day on April 2, 2016. She is truly an amazing young lady. Her strength and courage resonated with our families who found her to be powerful evidence of living your best life with CF. She is clearly in charge of her health and takes great care to maintain medications and treatments, all while managing school, friends and participating in sports. Kasey has found a way to illustrate the importance of compliance and a good attitude in the face of a chronic illness

Our families in attendance loved hearing from her and she spent time answering questions with individuals long after her talk was over. She was even taking pictures with a young sibling of one of our patients, providing an image for that young girl of a person whose strength is greater than her diagnosis. Kasey clearly made an impression on the audience.

We would certainly recommend her to anyone as a speaker or a mentor for younger patients needing some guidance and encouragement.

Sincerely,

**Fadel Ruiz, MD**
